**Combined In-use Skin Tolerance Observation & User Trial
On Subjects With Atopic Dermatitis Conducted With
“Callusan verde cream mousse / Cremeschaum”
(Cosmetic Study)**

Summary

Study Sponsor: **Greppmayr GmbH**
Hainbuchenring 4
82061 Neuried
Germany

Performance of Test: Derma Consult Concept GmbH
and Evaluation by Hermann-Wandersleb-Ring 4
53121 Bonn
Germany

Date of Order.....: 03.08.2023

Study Code.....: DCC23U015

Study Objective.....: To evaluate skin tolerance of the test product and its suitability
for the use by individuals with atopic dermatitis as
supplementary cosmetic care & subjective evaluation of its
cosmetic properties and efficacy in conditions of regular,
frequent use

Supervisors of Study: Dr. med. H. Prieur, Dermatologist – Allergist
B. Nissen, Manager Derma Consult Concept

Test Product.....: The test product, which was coded as follows, was provided by
Greppmayr GmbH in August 2023 in neutral packaging:

A. Callusan verde cream mousse / Cremeschaum
(25072023)

Test Area: Body

manager: Boris Nissen
bank account: Sparkasse KölnBonn BIC: COLSDE33XXX
IBAN: DE89 3705 0198 1902 2876 38

district court Bonn HRB 12566
VAT-REG.No. DE 209873944
Tax No. 205/5711/0927

Subjects : Number of individuals... : 30 (selected from 35 starting preconditioning)
Sex (completing)..... : 18 female, 12 male
Age range (completing) : 22-59 years (average: 41,4)
Main selection criteria... : atopic dermatitis (during symptom free interval) & min. occasional itching

Application..... : Duration.... : 28 days
Frequency .: twice daily

Test Period..... : September / October 2023

Results : **Skin Tolerance Assessment**

No incompatibility or discomfort resulting from the test product treatment was observed in or reported by any of the volunteers.

Overall, the test product showed good skin compatibility under the given test conditions and it can be concluded that, in normal use, the test product is suitable as a supplementary cosmetic care product for individuals with atopic dermatitis.

Subjective Evaluation / Questionnaire

After regular use during a period of 28 days, the test product was overall received favourably with the great majority of subjects confirming to be overall happy with the product, that they would prefer it over regular creams or ointments, would recommend it and would be willing to buy it. Regarding application they confirmed the product to be easy to apply, to be well and quickly spreadable, to have a pleasant scent, to feel pleasantly light on the skin, to be quickly and completely absorbed by the skin, not to leave a sticky or greasy feeling on the skin, but a pleasant skin sensation, after application their skin to feel intensely well-cared for, soothed and relaxed and the application to be overall more pleasant and quicker than that of a regular cream or ointment. Regarding efficacy in regular use they confirmed the product to intensely hydrate the skin, their skin to feel smoother and more supple, overall the product to alleviate / reduce skin irritations, to be suitable for their sensitive skin, to be more convenient than regular creams or ointments, the condition of their skin to have improved since using the product and presentation as form to be optimally suited for daily use. Of the affected subjects, the great majority confirmed the product to reduce feelings of tension, itching and skin redness.

Study Objective

To evaluate skin tolerance of the test product and its suitability for the use by individuals with atopic dermatitis as supplementary cosmetic care & subjective evaluation of its cosmetic properties and efficacy in conditions of regular, frequent use.

Performance of Test

The subjects were selected from the Derma Consult Concept GmbH database. They were informed about importance and meaning of the study; they could withdraw from the study at any time without giving any reason. To be able to immediately replace subjects at the start of the application phase, total 35 subjects were recruited to start the preconditioning phase. Written informed consent was obtained from all the subjects prior to entry into the trial. The following criteria were used for selection of subjects – apart from these criteria no adjustments to resemble any specific target population were made:

for inclusion in study:

- ≥ 18 years of age
- previously diagnosed with atopic dermatitis, at time of study / application phase start during a symptom free interval (no topical or systemic medical treatment)
- fundamentally clinically healthy (apart from previously diagnosed atopic dermatitis)
- min. occasional itching in designated treatment area during the week prior to start of the application phase (self-assessed)
- ability to comply with the requirements of the study

for exclusion from study:

- skin diseases or any other medical condition interfering with the objectives of the study
- acute atopic dermatitis phase, requiring medical treatment
- use of corticosteroids during 2 weeks prior to start of application phase
- pregnancy (women)
- planned medical treatment / vacation during study period

The subjects were instructed not to use any skin care preparations on their body (hands excluded) starting from seven days prior to testing (preconditioning phase) and until the end of the test. For skin cleansing during the preconditioning and application phases of the study, water and a mild syndet (Eubos[®] flüssig – blau; manufacturer: Dr. Hobein, D-53340 Meckenheim-Merl, Germany) were allowed only (hands excluded). Unavoidable contact of the test areas with other cleansing agents (i.e. when showering or bathing) was expressly not prohibited.

On the initial study visit to the test institute after the preconditioning phase, the subjects were questioned on their medical history, their skin condition was examined and the in- and exclusion criteria were reassessed. The first 30 subjects in good health matching the criteria were enrolled into the application phase of the study (see appendix II for data recording instrument). Any non-matching subjects were replaced.

After instructions to choose the areas of application (application on extended areas of the body in need of care by choice – covering predilection sites), the selected subjects were asked to complete the initial part of the study questionnaire (see appendix III) and subsequently received the test product along with application instructions as provided by the study sponsor and printed on the

samples for twice daily use on the body (application amount not standardized):

Shake can thoroughly before use. For extraction, hold the can with the nozzle facing downwards. See figure to the right. Use sparingly. Apply a walnut-sized amount onto the affected skin areas and massage in thoroughly. Only for external use on unharmed skin.

The subjects were reminded not to use any other skin care preparations on their body apart from the test product (hands excluded), to continue to use only the supplied mild syndet and water for skin cleansing (hands excluded) and asked to return to the test institute after 28 days of regular home use. In case of any problems with the test product, suspected incompatibility or discomfort, or a change in the condition of their atopic dermatitis, they were instructed to immediately contact the study supervisor and schedule a visit at the test institute. In case a subject reached a condition where topical or systemic medical treatment of her/his atopic dermatitis was required, the subject was immediately excused from the study. Any such events were recorded. Because of the staged nature of atopic dermatitis, drop-outs related to entering an acute phase are not attributed to the use of the test product, unless surrounding circumstances suggest a likely relation.

The subjects completing the full treatment period were, on their concluding visit, first asked to complete the second and final part of the study questionnaire (see appendix III) and subsequently were questioned on their experience with the test product with regards to skin tolerance issues or any other product related problems. Any problem reports were followed up by an in-depth interview and the designated treatment areas were examined for any signs of irritative or allergic responses to the test product.

Questionnaire design and evaluation were conducted using Keypoint 5.54 (MU + Data Entry, Cambridge Software Publishing, UK). For maximum compliance and ease in evaluation and to additionally minimize item nonresponse by making it easier for subjects to complete the questionnaire, closed dichotomous and multichotomous questions were used, the latter mostly in the form of a balanced Likert scale (expression of the level of agreement / disagreement to fixed statements). Because of the duration of the study in the subjective ratings of efficacy with regards to feelings of tension, itching and skin redness, a twofold approach was used on these central issues of the questionnaire. Besides the direct assessment, an indirect assessment was conducted by additionally questioning the subjects on the current state (looking back at the respective past week) at both times of questioning without revealing their prior responses on the second visit.

The questionnaire, designed according to the instructions of the study sponsor, is included in appendix III (German original as answered to by the volunteers & the English translation).

Results

The concluding study visit of subject 13 was delayed by 2 days for medical reasons unrelated to the conduct of the study – the subject continued product treatment. Considering the short delay in relation to the planned for total application duration of 28 days and no time-specific questions asked, the study supervisors accepted the timing deviation as preferable to a reduced subject number by excusing the affected subject from the study. As all other subjects completed the study as planned, the entire evaluation is based on the complete results from 30 volunteers, 18 females and 12 males. The completing subjects of this study were between 22 - 59 years of age (average: 41,4).

Tolerance / Incompatibility

None of the subjects dropped out of the study. No incompatibility was observed in or reported by any of the volunteers; also no reports of discomfort or any other kind of tolerance related problem were made.

Questionnaire Results

A full graphic and tabulated review of the questionnaire results can be found in appendix IV & V, the raw answers to the questionnaire in tabulated form in appendix VI.

The subjects rated themselves the skin in the treatment areas as 23% very dry, 70% dry and 7% normal. They rated the sensitivity of their skin as 23% very sensitive and 77% sensitive.

Regarding application after 28 days of regular use, the great majority of subjects confirmed the product to be easy to apply (97%), to be well (90%) and quickly (93%) spreadable, to have a pleasant scent (77%), to feel pleasantly light on the skin (90%), to be quickly (87%) and completely (83%) absorbed by the skin, not to leave a sticky (90%) or greasy (93%) feeling on the skin, but a pleasant skin sensation (90%), after application their skin to feel intensely well-cared for (87%), soothed (73%) and relaxed (77%) and the application to be overall more pleasant (77%) and quicker (70%) than that of a regular cream or ointment.

Regarding efficacy after 28 days of regular use, the great majority of subjects confirmed the product to hydrate the skin (97%) and to do so intensely (90%), their skin to feel smoother (90%) and more supple (87%), overall the product to alleviate / reduce skin irritations (83%), to be suitable for their sensitive skin (93%), to be more convenient than regular creams or ointments (73%), the condition of their skin to have improved since using the product (87%) and presentation as form to be optimally suited for daily use (87%). A majority of subjects additionally confirmed the product to soothe the skin in case of irritations (67%).

Efficacy in targeting feelings of tension, itching and skin redness was assessed by a twofold approach. In addition to directly asking the subjects about perceived effects at the end of the study, as indirect assessment, the subjects were additionally asked at the start and end of the study about their skin state with regards to feelings of tension, itching and skin redness during the respective past week prior to questioning (see crosstabs in appendix V).

Regarding feelings of tension, in the indirect assessment, 75% (12 out of 16 affected subjects) reported on both a lower frequency of occurrence and an improvement in intensity at the end of the study. This positive result was confirmed by the direct assessment with the great majority of the affected subjects answering that the product reduces feelings of tension (81%).

Regarding itching, in the indirect assessment, 83% (25 out of 30 affected subjects) reported on a lower frequency of occurrence at the end of the study and in terms of intensity, an improvement was reported on by 80% (24 out of 30 affected subjects). This positive result was confirmed by the direct assessment with the great majority of the affected subjects answering that the product reduces itching (86%) and a majority additionally answering itching to be immediately reduced after product application (60%).

Regarding skin redness, in the indirect assessment, 71% (15 out of 21 affected subjects) reported on a lower frequency of occurrence at the end of the study and in terms of intensity, an improvement was

reported on by 81% (17 out of 21 affected subjects). This positive result was confirmed by the direct assessment with the great majority of the affected subjects answering that the product reduced skin redness (86%).

In line with these results, the great majority of subjects confirmed to be overall happy with the product (97%), that they would prefer it over regular creams or ointments (73%), would recommend it (80%) and would be willing to buy it (80%) - within the price range they would normally spend on branded supplementary cosmetic care products.

Conclusion

No incompatibility or discomfort resulting from the test product treatment was observed in or reported by any of the volunteers.

Overall, the test product showed good skin compatibility under the given test conditions and it can be concluded that, in normal use, the test product is suitable as a supplementary cosmetic care product for individuals with atopic dermatitis.

After regular use during a period of 28 days, the test product was overall received favourably with the great majority of subjects confirming to be overall happy with the product, that they would prefer it over regular creams or ointments, would recommend it and would be willing to buy it. Regarding application they confirmed the product to be easy to apply, to be well and quickly spreadable, to have a pleasant scent, to feel pleasantly light on the skin, to be quickly and completely absorbed by the skin, not to leave a sticky or greasy feeling on the skin, but a pleasant skin sensation, after application their skin to feel intensely well-cared for, soothed and relaxed and the application to be overall more pleasant and quicker than that of a regular cream or ointment. Regarding efficacy in regular use they confirmed the product to intensely hydrate the skin, their skin to feel smoother and more supple, overall the product to alleviate / reduce skin irritations, to be suitable for their sensitive skin, to be more convenient than regular creams or ointments, the condition of their skin to have improved since using the product and presentation as form to be optimally suited for daily use. Of the affected subjects, the great majority confirmed the product to reduce feelings of tension, itching and skin redness.

 oft
 sehr oft

Frage 16. Falls sich in der letzten Woche zumindest selten **Hautrötungen** im Anwendungsbereich zeigten, wie stark waren diese normalerweise ausgeprägt:

<input type="checkbox"/> sehr schwach	<input type="checkbox"/> schwach	<input type="checkbox"/> deutlich	<input type="checkbox"/> stark	<input type="checkbox"/> sehr stark
---------------------------------------	----------------------------------	-----------------------------------	--------------------------------	-------------------------------------

Block 17. Falls sich **bei Studienbeginn** zumindest selten **Rötungen** zeigten, bewerten Sie bitte Ihre Zustimmung zu folgender Aussage über die Wirkung des Testproduktes:

	stimme voll und ganz zu	stimme eher zu	unentschieden	stimme eher nicht zu	stimme überhaupt nicht zu
Das Produkt mildert / reduziert Hautrötungen.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Anwendung - Ihre Einschätzung der Anwendungserfahrung

Block 18. Bitte bewerten Sie Ihre Zustimmung zu folgenden Aussagen über die Beschaffenheit und Anwendung des Testproduktes:

	stimme voll und ganz zu	stimme eher zu	unentschieden	stimme eher nicht zu	stimme überhaupt nicht zu
Das Produkt lässt sich leicht anwenden.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt lässt sich leicht verteilen.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt lässt sich schnell verteilen.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt hat einen angenehmen Geruch.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt fühlt sich auf der Haut angenehm leicht an.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt zieht schnell in die Haut ein.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt zieht vollständig in die Haut ein.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt hinterlässt kein klebriges Gefühl auf der Haut.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt hinterlässt kein fettiges Gefühl auf der Haut.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt hinterlässt ein angenehmes Hautgefühl.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Nach der Anwendung fühlt sich meine Haut intensiv gepflegt an.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Nach der Anwendung fühlt sich meine Haut beruhigt an.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Nach der Anwendung fühlt sich meine Haut entspannt an.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insgesamt ist die Anwendung angenehmer als bei einer herkömmlichen Creme oder Salbe.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insgesamt ist die Anwendung schneller als bei einer herkömmlichen Creme oder Salbe.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Wirksamkeit - Ihre Einschätzung der Effekte des Testproduktes

Block 19. Bitte bewerten Sie Ihre Zustimmung zu folgenden Aussagen über die Wirkung des Testproduktes:

	stimme voll und ganz zu	stimme eher zu	unentschieden	stimme eher nicht zu	stimme überhaupt nicht zu
Das Produkt spendet der Haut Feuchtigkeit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt spendet der Haut intensiv Feuchtigkeit.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Das Produkt beruhigt die Haut bei Reizungen.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Meine Haut fühlt sich glatter an.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Meine Haut fühlt sich geschmeidiger an.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insgesamt mildert / reduziert das Produkt Hautreizungen.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insgesamt ist das Produkt für meine empfindliche Haut geeignet.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insgesamt hat sich der Zustand meiner Haut verbessert, seit ich das Produkt verwende.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Insgesamt finde ich das Produkt praktischer als herkömmliche Cremes oder Salben.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Die Darreichung als Schaum ist optimal für die tägliche Verwendung.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Gesamtbewertung

Block 20. Bei der Beantwortung der folgenden Fragen nehmen Sie bitte an, dass sich der Preis des Produktes im Rahmen dessen bewegt, was Sie normalerweise für kosmetische Markenprodukte zur begleitenden Pflege ausgeben:

	Ja	Nein
Insgesamt bin ich mit diesem Produkt zufrieden.	<input type="checkbox"/>	<input type="checkbox"/>
Ich würde dieses Produkt kaufen.	<input type="checkbox"/>	<input type="checkbox"/>
Ich würde dieses Produkt herkömmlichen Cremens oder Salben vorziehen.	<input type="checkbox"/>	<input type="checkbox"/>
Ich würde dieses Produkt weiterempfehlen.	<input type="checkbox"/>	<input type="checkbox"/>

Vielen Dank für Ihre Mitarbeit.

User trial - Cream Mousse

Part I - Start of study

Thank you for your participation in this cosmetic trial. Before you have the chance to get acquainted with the test product, please answer the following questions about your current skin condition:

Your current skin condition

Question 1. How would you rate your skin in the *(selected)* treatment area? As...

<input type="checkbox"/> very dry	<input type="checkbox"/> oily
<input type="checkbox"/> dry	<input type="checkbox"/> combination skin
<input type="checkbox"/> normal	

Question 2. How would you describe your skin in the *(selected)* treatment area overall? As...

<input type="checkbox"/> very sensitive	<input type="checkbox"/> sensitive
<input type="checkbox"/> normal	<input type="checkbox"/> insensitive

Question 3. How often did you notice in the *(selected)* treatment area **feelings of tension** during the last week?

<input type="checkbox"/> never	<input type="checkbox"/> rarely	<input type="checkbox"/> occasionally	<input type="checkbox"/> often	<input type="checkbox"/> very often
--------------------------------	---------------------------------	---------------------------------------	--------------------------------	-------------------------------------

Question 4. In case you noticed at least rarely **feelings of tension** during the last week, how strong were these usually?

<input type="checkbox"/> very faint	<input type="checkbox"/> faint	<input type="checkbox"/> considerable	<input type="checkbox"/> strong	<input type="checkbox"/> very strong
-------------------------------------	--------------------------------	---------------------------------------	---------------------------------	--------------------------------------

Question 5. How often did you notice in the *(selected)* treatment area **itching** during the last week?

<input type="checkbox"/> never	<input type="checkbox"/> rarely	<input type="checkbox"/> occasionally	<input type="checkbox"/> often	<input type="checkbox"/> very often
--------------------------------	---------------------------------	---------------------------------------	--------------------------------	-------------------------------------

Question 6. In case you noticed at least rarely **itching** during the the last week, how strong was this usually?

<input type="checkbox"/> very faint	<input type="checkbox"/> faint	<input type="checkbox"/> considerable	<input type="checkbox"/> strong	<input type="checkbox"/> very strong
-------------------------------------	--------------------------------	---------------------------------------	---------------------------------	--------------------------------------

Question 7. How often surfaced in the *(selected)* treatment area **skin redness** during the last week?

<input type="checkbox"/> never	<input type="checkbox"/> rarely	<input type="checkbox"/> occasionally	<input type="checkbox"/> often	<input type="checkbox"/> very often
--------------------------------	---------------------------------	---------------------------------------	--------------------------------	-------------------------------------

Question 8. In case **skin redness** surfaced at least rarely during the last week, how strong was this usually?

<input type="checkbox"/> very faint	<input type="checkbox"/> faint	<input type="checkbox"/> considerable	<input type="checkbox"/> strong	<input type="checkbox"/> very strong
-------------------------------------	--------------------------------	---------------------------------------	---------------------------------	--------------------------------------

Thank you for your cooperation.

User trial - Cream Mousse

Part II - End of study

Thank you for your participation in this cosmetic trial. After you had the chance to get acquainted with the test product during the past 4 weeks, please answer the following questions about your current skin state and your impressions of the test product and its effects:

Your current skin condition

Question 9. How often did you notice in the (*selected*) treatment area **feelings of tension** during the last week?

<input type="checkbox"/> never	<input type="checkbox"/> rarely	<input type="checkbox"/> occasionally	<input type="checkbox"/> often	<input type="checkbox"/> very often
--------------------------------	---------------------------------	---------------------------------------	--------------------------------	-------------------------------------

Question 10. In case you noticed at least rarely **feelings of tension** during the last week, how strong were these usually?

<input type="checkbox"/> very faint	<input type="checkbox"/> faint	<input type="checkbox"/> considerable	<input type="checkbox"/> strong	<input type="checkbox"/> very strong
-------------------------------------	--------------------------------	---------------------------------------	---------------------------------	--------------------------------------

Block 11. In case you noticed **feelings of tension** at least rarely at the start of the study, please rate your level of agreement with the following statement about efficacy of the test product:

	totally agree	tend to agree	undecided	tend to disagree	totally disagree
The product reduces feelings of tension.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Question 12. How often did you notice in the (*selected*) treatment area **itching** during the last week?

<input type="checkbox"/> never	<input type="checkbox"/> rarely	<input type="checkbox"/> occasionally	<input type="checkbox"/> often	<input type="checkbox"/> very often
--------------------------------	---------------------------------	---------------------------------------	--------------------------------	-------------------------------------

Question 13. In case you noticed at least rarely **itching** during the last week, how strong was this usually?

<input type="checkbox"/> very faint	<input type="checkbox"/> faint	<input type="checkbox"/> considerable	<input type="checkbox"/> strong	<input type="checkbox"/> very strong
-------------------------------------	--------------------------------	---------------------------------------	---------------------------------	--------------------------------------

Block 14. In case you noticed **itching** at least rarely at the start of the study, please rate your level of agreement with the following statements about efficacy of the test product:

	totally agree	tend to agree	undecided	tend to disagree	totally disagree
Immediately after applicaiton, itching is reduced.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product reduces itching.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Question 15. How often surfaced in the (*selected*) treatment area **skin redness** during the last week?

<input type="checkbox"/> never	<input type="checkbox"/> rarely	<input type="checkbox"/> occasionally	<input type="checkbox"/> often	<input type="checkbox"/> very often
--------------------------------	---------------------------------	---------------------------------------	--------------------------------	-------------------------------------

Question 16. In case **skin redness** surfaced at least rarely during the last week, how strong was this usually?

<input type="checkbox"/> very faint	<input type="checkbox"/> faint	<input type="checkbox"/> considerable	<input type="checkbox"/> strong	<input type="checkbox"/> very strong
-------------------------------------	--------------------------------	---------------------------------------	---------------------------------	--------------------------------------

Block 17. In case **reddening** surfaced at least rarely *at the start of the study*, please rate your level of agreement with the following statement about efficacy of the test product:

	totally agree	tend to agree	undecided	tend to disagree	totally disagree
The product reduces skin redness.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Application - Your assessment of the application experience

Block 18. Please rate your level of agreement with the following statements about the properties and use of the test product:

	totally agree	tend to agree	undecided	tend to disagree	totally disagree
The product is easy to apply.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product is well spreadable.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product is quickly spreadable.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product has a pleasant scent.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product feels pleasantly light on the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product is quickly absorbed by the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product is completely absorbed by the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product does not leave a sticky feeling on the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product does not leave a greasy feeling on the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product leaves a pleasant skin sensation.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
After application, my skin feels intensely well-cared for.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
After application, my skin feels soothed.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
After application, my skin feels relaxed.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall the application is more pleasant than that of a regular cream or ointment.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall the application is quicker than a that of a regular cream or ointment.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Efficacy - Your assessment of the effects of the test product

Block 19. Please rate your level of agreement with the following statements about the efficacy of the test product:

	totally agree	tend to agree	undecided	tend to disagree	totally disagree
The product hydrates the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product intensely hydrates the skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The product soothes the skin in case of irritations.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
My skin feels smoother.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
My skin feels more supple.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall, the product alleviates / reduces skin irritations.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall, the product is suitable for my sensitive skin.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall, the condition of my skin has improved since I use the product.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
Overall, I consider the product to be more convenient than regular creams or ointments.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>
The presentation as foam is optimally suited for daily use.	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>	<input type="checkbox"/>

Overall evaluation

Block 20. In answering the following questions, please assume the price of the product to be within the range you normally spend on branded cosmetic products for supplementary care:

	Yes	No
Overall, I am happy with this product.	<input type="checkbox"/>	<input type="checkbox"/>
I would buy this product.	<input type="checkbox"/>	<input type="checkbox"/>
I would prefer this product over regular creams or ointments.	<input type="checkbox"/>	<input type="checkbox"/>
I would recommend this product.	<input type="checkbox"/>	<input type="checkbox"/>

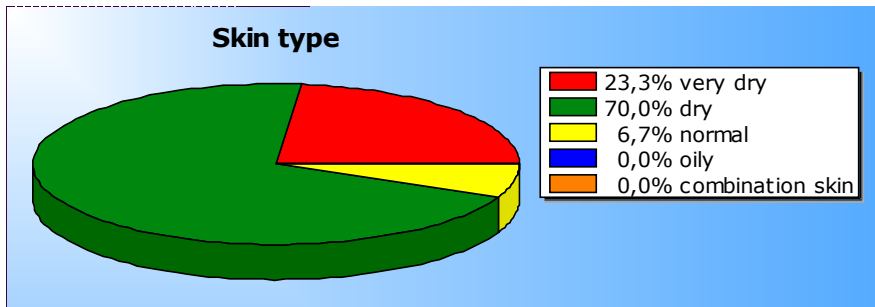

Thank you for your cooperation.
